PROFESSIONAL SUMMARY

Junior .NET Developer with practical experience in designing, developing, and maintaining web applications using the .NET ecosystem. Proficient in C#, ASP.NET Core, MVC, Web API, Entity Framework Core, and SQL Server. Skilled in building scalable and maintainable applications, implementing clean code principles, performing unit and integration testing, and troubleshooting software issues. Strong team player with the ability to collaborate effectively in agile environments and deliver high-quality software solutions.

EXPERIENCE

Sieraj

Apr 2025 - Present

Software Engineer Intern

Maadi, Cairo

- Assisted in the development and maintenance of web applications using C# and ASP.NET Core.
- Participated in designing and implementing RESTful APIs and backend services.
- Worked with SQL Server and Entity Framework Core for database development and management.
- Followed software development best practices, including clean code principles and version control using Git.

Digital Egypt Pioneers Initiative (DEPI)

Jul 2025 - Dec 2025

Full Stack Developer (.NET) Intern

- Developed 2+ training-based and academic web applications using C#, ASP.NET Core Web API, and SQL Server, following clean code principles.
- Implemented Entity Framework Core to manage database operations and optimize data access.
- Built responsive front-end interfaces using HTML5, CSS3, JavaScript, and Bootstrap.
- Collaborated within an Agile/Scrum team of 4–5 members, using Git & GitHub for version control.
- Performed unit testing and maintained technical documentation to ensure code quality.

Freelancer Software Engineer

Oct 2025 - Present

Self-Employed

Freelance

- Designed, developed, and customized web applications and landing pages using ASP.NET Core, JavaScript, Bootstrap, and SQL Server.
- Built and integrated RESTful APIs to support scalable and efficient web solutions.
- Collaborated directly with clients to gather requirements, provide technical consultations, and deliver tailored solutions.
- Maintained and enhanced existing applications by troubleshooting issues, fixing bugs, and improving performance.

PROJECTS

CVision | Graduation Project

Aug 2025 - May 2026

- Developed an AI-powered recruitment platform for CV analysis, AI interviews, candidate feedback, and applicant tracking.
- Built backend services and APIs using ASP.NET Core, Entity Framework Core, and SQL Server.
- Collaborated with a team to deliver a scalable recruitment solution.

Mabbet.com [GitHub](#)

Jan 2025 - Apr 2025

- Designed and implemented a full-stack web application connecting Owners listing accommodations with Clients searching for rooms, apartments, or student housing. Focused on creating a secure, intuitive, and feature-rich platform.
- Built 5+ RESTful APIs and integrated Entity Framework Core for database management.

Mojaz24 [Website](#)

Mar 2026 - May 2026

- Built the backend system using ASP.NET Core and SQL Server to handle content management, user interactions, and data storage.
- Designed and implemented RESTful APIs to support seamless communication between the frontend and backend.
- Implemented content management features and optimized website performance.

Fitness Tracker Application [GitHub](#)

Sep 2025 - Nov 2025

- Developed a Java-based Fitness Tracker Application implementing Factory, Singleton, Decorator, Adapter, and Builder design patterns. The application allows users to manage workouts, track fitness goals, and create personalized diet plans. Demonstrated strong skills in OOP, modular design, and GUI development.

CPU Scheduling Simulator [GitHub](#)

Feb 2024 - Apr 2024

- Developed a desktop application to simulate various CPU scheduling algorithms with real-time visualization of process execution and performance metrics (Wait Time, Turnaround Time).

Social Media Pattern Recognition [GitHub](#)

Jan 2024 - Mar 2024

- Built a Machine Learning model to detect and analyze user behavior patterns on social platforms for behavioral prediction.

EDUCATION

Egyptian E-Learning University (EELU)

Sep 2022 - Jun 2026

Bachelor of Computer Science , Information Technology

SKILLS

- Skills:** Software Development Life Cycle (SDLC), Design Patterns
- Languages:** C#, SQL, Java, Python, C/C++, JavaScript, HTML5, CSS3
- Frameworks & Libraries:** ASP.NET Core, Web API, Entity Framework (EF) Core, Bootstrap, Django
- Databases:** Microsoft SQL Server
- Concepts & Others:** OOP, Data Structures & Algorithms, RESTful Architecture, Unit Testing, Agile/Scrum, Machine Learning (NLP, Deep Learning)

LANGUAGES

- Arabic (Native)
- English (Professional Proficiency)
- German (Basic)
